

### The RedTitan Font Bureau

- Fonts, logos, barcodes and images sourced.
- Font cartridges and ICR cards available.
- All printer formats supplied.
- Customised solutions.
- Discounts for large orders.
- Express service.

*The RedTitan Advantage...*

RedTitan operates a comprehensive digitising service for sourcing and supplying fonts, signatures, logos and barcodes for users of laser printers, ion deposit printer and image setters. All leading makes of laser printer are supported, including Xerox, HP, Star, Canon, Fujitsu, IBM, DEC, Siemens and Kyocera.

As leading software research and developers in the laser printing business, RedTitan can offer customised solutions to all your needs.

Just give us a call with your font and image requirements or send a data tape for conversion and we do the rest.

*We make it easy!*

#### Fonts

As well as fonts held in the RedTitan font library, RedTitan supplies licensed fonts for PC-compatible or Apple Macintosh machines from all leading suppliers, such as Bitstream, Digitype, URW and Agfa-Compugraphic — over 1500 styles in total. Fonts are available in bitmap or scalable outline format and in all commonly used printer formats. Fonts are supplied on diskette tape, font cartridge and IC card.

#### Graphics, logos, signatures and letterheads

RedTitan can digitise your organisation's logos, signatures and even complete letterheads and footers. These are converted to any commonly used format: TIFF, PCX, PostScript, 'logo' fonts (for Xerox CEPs). Graphics are supplied on diskette tape, font cartridge and IC card. Discounts are available for large orders.

#### Barcodes and OCR fonts

RedTitan can supply any barcode in use today. These are available on diskette, tape, font cartridge or IC card. The RedTitan library holds many

examples of different barcodes, but because some barcode readers are more tolerant than others, and some barcode label printers print darker than others, we can easily create new barcodes of different dimensions and thicknesses for specific purposes. We also supply a range of machine readable (OCR) fonts.

#### Font cartridges and IC cards

Cartridges, IC cards, PCMCIA cards and SIMM cards can be encoded with the your choice of fonts, logos, signatures, forms and barcodes to match a corporate style or the needs of special project. RedTitan designs and manufactures its own font cartridges, thus allowing corporate clients to gain discounts on large quantities.

-----  
*Outline font formats*

- HP/Agfa Compugraphic Intellifont
- PostScript Type 1
- Bitstream Speedo
- Windows TrueType

-----  
*Bitmap font formats*

- Xerox
- Siemens/Nixdorf
- IBM/Lexmark
- HP-PCL
- Konica
- Nipson/Bull
- Canon
- DEC

-----  
*Media*

- Floppy disk
- Magnetic tape
- Cartridge
- IC card
- PCMCIA card
- SIMM card

-----  
*Delivery*

- Email instantly worldwide
  - Express courier 1 to 3 days worldwide
  - Next day mail 24hr UK
  - Standard mail 24hr plus
